

PAUL SCHELHAAS

INNOVATION · IP · COMMERCIALISATION

Multi-patent inventor and former CEO. I help security, energy and industrial businesses invent new technology, solve hard engineering problems, and protect the intellectual property that results, because I have designed and patented it myself, repeatedly.

NAMED INVENTOR, GLOBAL PATENTS

#5

IFSEC GLOBAL MOST INFLUENTIAL IN SECURITY, 2018

PROFILE

Not a career consultant. An inventor who built it.

SUNSTONE IP SYSTEMS / CO-FOUNDER & CEO

For over two decades I have worked at the sharp end of the security and technology industries: inventing products, building a business, and solving problems for some of the world's most demanding organisations.

I co-founded Sunstone IP Systems and led it from startup to a multimillion-pound, award-winning enterprise in solar-powered surveillance and off-grid power. I am named as an inventor on multiple global patents, and equipment I invented and produced has been sold into organisations including Chevron, Network Rail, Telent and Wesco Anixter.

That experience means I know exactly what it takes to turn a good idea into a robust, real-world product. I now offer that expertise to a small number of ambitious businesses that need senior-level guidance without the full-time cost.

CAPABILITIES

01

Fractional Chief Innovation Officer

Senior innovation leadership part-time: strategic direction, IP oversight and product-to-market guidance, without a permanent executive salary.

02

Innovation & Commercialisation Strategy

From assessing your current IP portfolio to building the roadmap that turns a protected invention into a real, finished product.

03

IP Strategy & Patent Portfolio

Protecting, valuing and monetising intellectual property with the rigour of someone who has been through the process firsthand.

04

Technical Design & Systems Engineering

Turning a difficult brief into a working design: system architecture, engineering for harsh and safety-critical environments, and design-for-manufacture.

05

Board Advisory & NED Roles

Independent, commercially sharp oversight for leadership teams preparing for growth, investment or exit.

06

Diligence & Dispute Support

Helping investors separate genuinely valuable IP from hype, plus credible, senior-level input on IP and technology disputes.

EQUIPMENT I INVENTED, DEPLOYED & TRUSTED BY

CHEVRON

NETWORK RAIL

TELENT

WESCO ANIXTER

DIGITAL BARRIERS

WJ GROUP

TRACK RECORD

Built & scaled Sunstone IP Systems

Co-founded and led the business from concept to a multimillion-pound clean-tech enterprise over 15+ years, with a portfolio of patented off-grid platforms and partnerships with Telent, Digital Barriers and WJ Group.

Invented equipment sold into global blue-chips

Equipment I invented and helped produce has been sold into supermajors and critical national infrastructure operators, deployed in some of the most demanding environments on earth.

Invented global patents

Named inventor on a family of granted patents covering solar-powered surveillance and off-grid power. Defensible IP with multi-year design lives operating in extreme environments.

Built teams that stayed

Recognised as an inspirational leader who attracts, motivates and retains highly qualified technical and commercial professionals, reducing key-person risk.

RECOGNITION · 12 INDUSTRY AWARDS, 2014 TO 2023

2023	Security Partnering Initiative S&FE Awards	WINNER	2018	Top 50 Most Influential IFSEC Global	VOTED 5TH
2023	Rising Star Engineering & Manufacturing Awards	FINALIST	2018	SME & Innovation Canterbury Business Awards	WINNER
2023	Sustainable Transport National Sustainability Awards	SHORTLISTED	2018	Innovation CIHT Awards	HIGHLY COMMENDED
2021	Security Company of the Year S&FE Awards	FINALIST	2017	SME Installer & Project of the Year S&FE Awards	WINNER
2021	Champion of Champions S&FE Awards	FINALIST	2017	Service Delivery Model of the Year LGC Awards	WINNER
2020	Network Management Highways England	WINNER	2014	Wireless HD CCTV ADS Security Innovation Awards	HIGHLY COMMENDED

“Paul doesn't just talk about innovation. He has done it, and his ability to bridge the technical and the commercial is rare.”

HEAD OF VENTURES · GLOBAL OIL AND GAS TECHNOLOGY ACCELERATOR · AVAILABLE AS A PERSONAL REFEREE

WAYS TO WORK TOGETHER

RETAINER

Fractional CINO / Innovation Lead

Embedded strategic leadership, IP oversight and team mentorship on a monthly retainer.

PORTFOLIO

Operating Partner / Senior Advisor

For PE and VC firms: technical due diligence, post-acquisition value creation and exit preparation.

FIXED FEE

Design Sprint

A targeted engagement to solve a technical problem, shape a product concept or drive a cost-saving design.

AVAILABLE FOR

FRACTIONAL CINO

BOARD ADVISORY & NED

IP STRATEGY

COMMERCIAL DUE DILIGENCE

EXPERT WITNESS & IP DISPUTES

KEYNOTE SPEAKING

BESPOKE BUILD

Bespoke solution design, prototyping and testing, from concept to market in five stages: understand, design, prototype, test and refine, document and protect.
